

Imagility Immigration Datasheet

Imagility is redefining the immigration landscape with a powerful, AI-driven platform purpose-built to streamline every stage of the petition lifecycle. From intelligent petition building and qualification mapping to real-time RFE response generation and AI-assisted guidance, Imagility delivers an end-to-end solution that reduces RFEs, accelerates case completion, and drives immigration success with confidence.

Key Features

AI-Powered Petition Builder

Imagility's AI-Powered Petition Builder revolutionizes the immigration practice by intelligently guiding users with its cutting-edge technology, ensures accuracy, reduces errors, and generates personalized content using built-in templates and compliance checks. AI-Powered Petition Builder empowers users to build complete immigration petitions in minutes with unmatched speed and precision.

AI Powered RFE Builder

Imagility's AI Powered RFE Builder streamlines and accelerates the response process to USCIS RFE's with AI-guided precision; helping employers and other stake holders craft clear, compliant, and compelling responses by intelligently mapping evidence to USCIS concerns. With built-in templates, real-time validation/collaborative tools, the system reduces turnaround time, minimizes the risk of denials and respond to RFEs faster with greater accuracy and confidence.

AI Petition Analysis

Imagility's AI-Powered Petition Analysis delivers instant, in-depth reviews of immigration petitions, identifying gaps, inconsistencies, and compliance risks with pinpoint accuracy (Examples -USCIS Forms, Support Letters, Expert Opinion Letters etc.,). Leveraging advanced AI, the system ensures every petition is audit-ready and aligned with USCIS standards, to reduce RFEs and denials while gaining powerful insights—all in just minutes.

AI Assistant

Imagility's AI Assistant is a smart, always-on immigration expert co-pilot offering real-time guidance, compliance checks, documentation, instant answers, and smart recommendations across visa types like H-1B, L-1, and PERM. Built on deep immigration domain knowledge and trained on USCIS rules, it helps users navigate complex workflows, flag issues, and complete petitions faster with greater accuracy.

- ☐ H-1B
- ☐ L-1A/L-1B
- ☐ F-1/OPT/CPT
- ☐ H-4/EAD
- ☐ GC
- ☐ TN
- ☐ E3

Immigration Wizard

Imagility's Immigration Wizard simplifies the entire petition-building journey with an intuitive, step-by-step interface that guides users through each form and document. It ensures accuracy, compliance, and completeness by intelligently mapping inputs to USCIS forms, support letters, and SOC mappings. This smart automation empowers users to confidently manage complex immigration workflows with ease.

Prompt Engineering

Imagility's AI Prompt Engineering harnesses decades of immigration domain expertise to craft precise AI inputs tailored specifically for complex visa petitions like H-1B and PERM. This ensures AI-generated forms, support letters, and legal narratives are accurate and fully compliant with USCIS regulations. By merging expert knowledge with advanced AI, Imagility accelerates petition preparation, reduces RFEs, and empowers legal teams to file with unmatched confidence and speed.

Protect Data Against Breach

Imagility delivers uncompromising data protection with enterprise-grade security protocols that safeguard sensitive immigration data at every step with secure cloud architecture, and continuous threat monitoring. All information is encrypted in transit and at rest, ensuring compliance with industry standards. Advanced access controls, audit logs, and breach detection systems provide continuous monitoring and rapid incident response.

Beneficiary Qualification Mapping

Imagility's Beneficiary Qualification Mapping intelligently aligns a candidate's education, experience, and skills with the job requirements and SOC codes—ensuring strong petition justification. It highlights gaps, flags inconsistencies, and provides clear documentation support to meet USCIS standards.

OCR Technology

Imagility's OCR technology revolutionizes document processing by seamlessly extracting critical data from scanned forms and images. It ensures fast, accurate, and automated data entry, reducing manual effort and minimizing errors. Imagility's OCR empowers faster petition preparation with greater precision and efficiency streamlining workflows, compliance and decision-making

H-1B Petition with Bulk Upload

Imagility's H-1B Bulk Upload feature is built for speed, scale, and accuracy—perfect for high-volume filings. Instantly upload hundreds of candidate profiles via Excel or CSV and auto-generate complete petitions, including USCIS forms, support letters, and SOC codes. Our intelligent engine ensures data integrity, eliminates redundancy, and dramatically reduces processing time - cutting effort by over 70% and maximizing productivity when it matters most.

Data migration

Imagility's Data Migration feature ensures a fast, flawless, secure, and seamless transition from legacy systems or spreadsheets to the Imagility platform. Whether migrating single petitions or thousands of records, our intelligent import engine maps, cleans, and validates data with precision, eliminating manual errors and saving time. Imagility makes complex data migration simple, so you can hit the ground running from day one
