

VISA DESIGNER

Imagility's Visa Designer is an added feature which can be used to design visas for additional visas or to make changes to available visas.

@ sales@imagility.co

www.imagility.co

The **Visa Designer** is a tool to create a new visa from an existing form by editing some fields. You can also create a new visa by mapping it to a new form and adding other petition components.

This is **Adaptive Technology at its best**, with the ability to make global changes across the platform within a short time span.

Visa Designer Steps

01

Create Task & Sub-task Details (Drag & drop fields/components)

Drag and drop from placeholders based on task parameters required.

The screenshot displays the 'Visa Designer' interface for the first step: 'Create Task & Sub-task Details (Drag & drop fields/components)'. The interface is divided into several sections:

- Placeholders:** A sidebar on the left with a 'Drag & drop required fields & sections from list' button. It contains a list of 'Standard Sections' with checkboxes: 'Task Details' (checked), 'Sub-task Details' (checked), 'Call to actions - Button' (checked), and 'New empty section'.
- Drag & drop required fields & sections from list:** The main workspace, divided into two sections:
 - Enter Task Details:** Contains fields for 'Task Type*' (dropdown), 'Visa Type*' (dropdown), 'Petition Type*' (dropdown), 'Petitioning Company*' (dropdown), and 'Beneficiary Name*' (dropdown with a person icon).
 - Enter Sub-task Details:** Contains a toggle for 'Is petition filed outside Imagility?' (set to 'No') and a 'Write your Question' field with a 'No' toggle.
- Placeholders (Right):** A sidebar on the right with a 'Select pre-defined field' dropdown. It contains a 'Question' field with a placeholder 'Enter your question here?'. Below it are 'Toggle Values' (Yes/No) and 'Default selection' (Yes/No) options. There are also 'Additional settings' for 'Required' (checked) and 'Read only' (unchecked). At the bottom are 'Save Field' and 'Delete Field' buttons.
