

WELCOME TO IMAGILITY

SMART SOLUTIONS FOR MODERN IMMIGRATION

Imagine a system that handles millions of visa and asylum applications quickly, securely, and with safeguards reducing the probability for errors to almost zero, giving your teams more time and bandwidth to focus on what matters most: supporting secure mobility, regulatory compliance, economic development, and public safety.

Company Overview

Imagine a system that processes thousands of visa and asylum applications quickly and securely, allowing government teams to focus on compliance, national security, and efficient public service delivery.

Our Story – Built from Real Immigration Challenges

-  **2019:** Founded by an immigration technology expert with over three decades of experience who saw too many delays and errors in immigration paperwork and an immigration landscape that is constantly evolving with new rules and regulations.
-  **2020:** Launched our first AI-powered platform to make forms smarter and faster.
-  **2021:** Added easy team collaboration tools so multiple people can work on cases together safely.
-  **2023:** Expanded with advanced analytics to help users see trends and save time.
-  **2026:** Trusted by thousands of immigration professionals worldwide, with strong focus on security and cloud-based scalability. Imagility is in discussions with several countries in building out their digital infrastructure to address country specific needs pertaining to immigration.

Who We Are and What We Do

Imagility is a secure, cloud-based software platform designed to simplify immigration processes from start to finish. We help governments and agencies manage high volumes of applications efficiently while keeping data safe and private.

-  **Intelligent Petition Building:** AI guides users through forms, suggests answers, and catches mistakes right away.
-  **Document Management:** Easy upload, organization, and verification of passports and supporting files.
-  **Workflow Automation:** Automates repetitive tasks, sends reminders, and tracks cases from application to decision.
-  **AI Document Scanning:** Uses AI to scan documents, extract data automatically, and eliminate manual entry of forms.
-  **Advanced Security and Verification:** AI detects potential fake documents, plus secure connections to internal security databases for reliable background checks.

The Imagility Advantage:

In such a brief period, Imagility has delivered measurable efficiency gains for public- and private-sector immigration stakeholders globally in several ways through its revolutionary technology and features.

-  Time needed to complete a petition has gone from 1 month to 7 minutes resulting in significant reduction in time and work allowing for greater efficiencies of scale.
-  Our petition analysis and our tools to automate the process have reduced margin for errors to almost zero while minimizing additional inquiries.
-  Our clients have realized significant cost savings as a result of our product. Their margins have increased by about 40% along with increasing their client base by about 30%.

As a result of our flagship product in the U.S., which has started to gain market share and disrupt the industry, Imagility's technology and features will now be available for seamless integration with country-specific regulatory and operational needs.

Imagility's Services Make Immigration Smarter & Safer

Intelligent Petition Building

- Description: AI guides form completion, auto-fills data, suggests answers, and flags errors instantly.
- Help for Government: Speeds visa/asylum apps with auto-checks, no extra training; connects to databases.
- Savings: **60% less time (hours to minutes), 80% fewer errors, 50% lower admin costs.**

Document Management

- Description: Secure upload, organize, store files; track versions, link to cases, safe sharing.
- Help for Government: Centralizes docs for easy agency access; no lost files or duplicates.
- Savings: **40-50% less search time, 70% fewer misplaced errors, 30-40% cost cuts (less physical storage).**

Workflow Automation

- Description: Automates process from receipt to approval; reminders, tasks, tracking.
- Help for Government: Streamlines e-visa/asylum tasks for timely decisions; flags readiness and gaps early.
- Savings: **45-60% faster turnaround (weeks to days), 50% fewer missed deadlines, 40% lower costs.**

AI/OCR Document Scanning

- Description: AI scans docs, extracts info like names/dates, auto-fills forms without typing.
- Help for Government: Handles diverse/multilingual docs for quicker, accurate reviews.
- Savings: **70-80% less data entry time (hours saved), 30-50% fewer errors, 50% cost reduction.**

Advanced Security and Verification

- Description: AI detects fakes; secure database links for real-time checks, with encryption.
- Help for Government: Boosts security via auto-fraud detection and integrations, without delays.
- Savings: **40% faster detection (50-70% time saved), 60% fewer fraud errors, 40% lower enforcement costs.**

Together, these services can transform your immigration operations – imagine handling more applications with less effort and greater trust.

Current E-Visa Process vs. Imagility-Enhanced Workflow

CURRENT

⊗ Account Creation

Current: Access the official national immigration portal to create an account, log in, and pick visa type. Problems like lost passwords or site crashes happen often.

⊗ Form Completion

Enter details by hand, passport info, and trip plans. No instant checks, so mistakes lead to rejections later.

⊗ Document Upload

Upload passport scan, photo, and extra files. Basic checks, but issues like big files cause errors and restarts.

⊗ Review & Payment

Check your info yourself, agree to rules, pay fee with card. Get email confirm, but no auto-error finder.

⊗ Processing Approval

Routed to manual review queues; timelines vary widely due to backlogs, peak volumes, or additional security checks. Status updates are typically issued through official communication channels, often requiring manual follow-up.

IMAGILITY

☑ Account Creation

Auto-sign up with secure link; AI checks if you qualify and picks the right visa type based on your travel info, linking smoothly to the site.

60% faster, 50% fewer sign-up errors.

☑ Form Completion

AI scans passport to fill in fields automatically, checks for matches, and gives smart tips; works with different languages for all applicants.

70% faster, 80% fewer wrong entries.

☑ Document Upload

AI scans files right away for realness, fixes sizes, spots changes, and warns if anything is missing; stores safely with easy updates.

75% faster, 70% fewer bad uploads.

☑ Review & Payment

AI checks everything before send, shows fixes; adds safe payment with fake-check and makes a quick summary for you to okay.

80% faster, 60% fewer check mistakes.

☑ Processing Approval

AI automatically categorizes low- and high-complexity cases, accelerates processing for routine applications, and integrates with security or identity data sources for faster screening. Complex cases are routed to authorized officers. Applicants receive updates via configured digital channels.

60-70% faster, 40% fewer incorrect rejections

Overall, Imagility could cut end-to-end time from 7-10 days to 1-3 days, reduce errors by 60-70%, and save millions in operational costs (based on benchmarks from similar systems). This supports national goals such as secure travel, workforce mobility, cross-border mobility and economic activity, and economic development.

Sample Humanitarian, Protection & Special Case Workflow

CURRENT

⊗ Initial Contact & Booking

Contact designated protection, immigration, or public service intake channel via helpline or online portal.

⊗ Document Submission & Verification

In-person submission of ID, entry proof, family docs; manual reviews lead to incompleteness or fakes.

⊗ Registration Interview & Biometrics

Attend appointment to provide details and biometrics; initial interview (15-45 min) with manual data entry.

⊗ Residence Permit Application (to MOI)

Submit documentation to the relevant national authority for temporary or long-term legal status approval; manual processing and security clearance.

⊗ Interview & Processing

Conducted by designated administrative, protection, or regulatory authority based on national frameworks.

⊗ Decision, Card Issuance & Renewal

Get status document, permit, or identification credential or rejection; renewals require repeat visits and paperwork.

IMAGILITY

☑ Initial Contact & Booking

AI-guided online pre-registration with smart queuing, eligibility checks, and priority for vulnerable groups like children or those with medical needs.

70% faster, 50% fewer invalid bookings.

☑ Document Submission & Verification

Pre-upload AI scanning verifies authenticity, extracts data, flags issues, and guides fixes before appointment.

75% faster, 70-80% fewer incomplete or fraudulent docs

☑ Registration Interviews & Biometrics

AI pre-fills forms from scans; integrates biometrics; automated checks speed up the interviews.

60% faster, 60% fewer data entry errors.

☑ Residence Permit Application (to MOI)

Automated form filling with secure connections to identity and border control databases for faster verification.

65% faster, 50% fewer clearance delays.

☑ Interview & Processing

AI structures case information and supporting evidence, flags inconsistencies, prioritizes cases; automation tracks evidence.

60-70% faster, 65% fewer incomplete claims.

☑ Decision, Card Issuance & Renewal

Automated notifications, digital card options, renewal reminders, and compliance tracking.

55% faster, 50% fewer renewal errors.

Current end-to-end process: Often **3-12+** months (or longer due to backlogs), high error rates from manual handling, frequent rejections/delays, and significant administrative costs amid high volumes.

1-4 weeks for simple cases, with **60-75%** time cut and lower costs.

This means quicker processing and better security via AI.

Why Governments Choose Imagility

Imagility combines deep immigration knowledge with advanced software engineering to build solutions that adapt to changing policies. Our team and processes deliver fast, secure value for governments and public sector agencies worldwide.

Our Core Qualifications

 **Unique Expertise in Immigration and Software Development:** Founded by immigration attorneys and tech experts, we translate policy changes – such as newly enacted asylum or immigration regulations – into software features for compliance and efficiency. Our platform updates forms, workflows, and security in real time.

Team and Development Structure: Our team of immigration specialists, engineers, and AI developers works in agile groups. This setup promotes collaboration and builds scalable systems guided by legal insights.

 **Cutting-Edge Technology and Processes:** Using AI, document scanning, and cloud tech, we provide smart automation for high volumes. Short development cycles (2-4 weeks) allow quick demos and adjustments, with built-in security like encryption.

“ Our expertise turns policy shifts into operational strengths – faster, safer, and always up-to-date. ”

Why Governments Choose Imagility Our strengths meet the needs of governments, from handling refugees to secure visas. Here's how:

Key Qualification	Government Benefits	Outcome Highlights
 Dual Immigration-Tech Expertise	Quickly adds policy updates and adapts workflows for relevant national ministries, humanitarian agencies, or judicial bodies.	 Features ready in weeks, not months
 Agile Sprints and Rapid Demos	Short cycles for prototypes and pilots on e-visa or asylum, with fast feedback.	 50-70% faster rollout and efficiency.
 Built-In Security Focus	Encryption and AI fraud detection reduce risks in data sharing.	 40-60% fewer security issues, protects data.
 Ongoing Maintenance Structure	Teams handle updates, monitoring, and support for new threats and rules.	 Cuts downtime and costs by 30-50%

Imagility enables immigration and mobility authorities to operate securely, efficiently, and at scale through configurable digital infrastructure. Contact us to explore tailored solutions.
